Understanding Your Protected Health Information (PHI)

Each time you receive AToN Center Inc. services, a record is made of your symptoms, examinations, test results, diagnoses, treatment plan, and other mental health or medical information. Your record is the physical property of the health care provider. The information within belongs to you. Being aware of what is in your record will help you to make more informed decisions when authorizing disclosures to others. It also gives you an opportunity to ensure it is accurate. In using and disclosing your PHI, it is our objective to follow the Privacy Standards of the Federal Health Insurance Portability and Accountability Act (HIPAA) and requirement of state law.

Your Mental Health and/or Medical Record Serves as:

- A basis for planning your care and treatment.
- A means of communication among the health professionals who may contribute to your care.
- A legal document describing the care you received.
- A means by which you or our business can verify that services billed were actually provided.
- A source of information for public health officials charged with improving the health of the nation.
- A source of data for business planning.
- A tool with which we can assess and continually work to improve the care we render and the outcomes we achieve.

- Since psychological records contain personal and sensitive information, non-clinicians often misunderstand them. It is thus recommended that you obtain general reports or summaries provided by your therapist, or that you have your records released directly to a licensed mental health clinician for interpretation. Should you request access to your entire record, it is important that your therapist reviews the information with you and explains the use of any abbreviations, clinical terms, results of psychological tests and raw data, and diagnoses and their rationale.
- Records may not be released if it is clear that their release would directly result in serious harm to the requestor.
- Request and provide written authorization and permission to release PHI for purposes of outside treatment and health care. This authorization excludes psychotherapy notes and any audio/video tapes that may have been made with your permission for training purposes.
- Revoke your authorization in writing at any time to use, disclose, or restrict health information except to the extent that action has already been taken.
- Request a restriction on certain uses and disclosures of PHI, but we are not required to agree to the restriction request. You should address your restriction in writing to the Privacy Officer by asking for name of Privacy Officer, address, and phone. We will notify you within 10 days if we cannot agree to the restriction.
- Request that we amend your health information by submitting a written request with reasons supporting the request to the Privacy Officer. We are not required to agree with the requested amendment.
- Obtain an accounting of disclosures of your health information for purposes other than treatment, payment, health care operations, and certain other activities for the past six years but not before April 14, 2003.
- Request confidential communications of your health information by alternative means or at alternative locations.
